- It is well suited for indoor and outdoor leak detection and inspection
- It is light and small enough to fit in your pocket

Power: 3 Watt

Dimensions: L133, diameter 15 mm

Weight: 28 gr

UV torch

FLEXIBLE BRIGHT TORCH 5 LED UV

You can use this twin-headed UV torch with its flexible probe to locate refrigerant gas leaks even in spots that are very difficult to illuminate.

Position the UV head on the body of the torch either directly or on the probe. Inspect every part of the air-conditioning system: it will become fluorescent with the tracer.

- Power supply: 3 AA 1.5 V batteries.
- Goggles with 100% UV protection.
- UV light frequency: 385 – 380 nm.
- Head with 5 white LEDs.
- Aluminium body.
- Blister.
