Oil

PHARMA – FOOD INDUSTRIES

BLUE DYE TRACER is a blue pigment dispersion in mineral oil with a high degree of purity. It has been developed specifically to address problems in detecting oil leaks in the gear housing of hydraulic systems in the food industry. The mineral oil base complies with FDA 21 CFR 172-878 and 178-3620a, and is recorded under the number 128122, code category 3H / H1 by NSF International. The dispersed blue pigment is compliant for contact with food in accordance with Resolution AP (89) 1 of the Council of Europe, EEC Directive 94/62.

Product	Reference	Unit price (exc. tax)
