

Wastewater – the environment – buildings – industry

DETECT + WHITE

UV DETECT + WHITE colourless tracer is water soluble and only visible in blue UV light. It is perfect for plumbers and piping professionals, property surveyors and inspectors, leak detection specialists and building and industrial experts – as well as for any private individuals wanting to carry out their own investigations.

NB: identifiable with a 365 nm UV torch

Applications

UV DETECT + WHITE colourless tracer is water soluble and only visible in blue UV light. It is specially designed for:

- Roof / terrace / balcony / floor tightness tests
- Leak and infiltration inspections in buildings
- Wastewater, rainwater and industrial wastewater flow-rate tests
- Simulation of agricultural spreading
- Inspecting hydraulic connections between the natural environment and buildings
- Searching for water infiltration on floors, interior walls and facades
- Visual identification and connection tests for buried pipes
- Chemical dispersion simulation
- Leakage search on floor heating and glycol cooling systems
- Leakage search on storage tanks
- Tightness tests on sensitive and absorbent media

Strengths

- Enhanced fluorescence contrast and easily detectable for several hours
- Very good solubility with easy dispersion
- Does not stain surfaces and is easy to rinse
- Simply rinse with water after use
- Non-polluting, non-toxic and no danger to the environment

Product	Reference	Unit price (exc. tax)
DETECT+ WHITE 250g	DW+250	€ 43.25
DETECT+ WHITE 1kg	DW+1000	€ 115
DETECT+ WHITE 500ml	DW+500L	€ 29.90
